

QA Engineer

Taras Shevchenko

I am a self-motivated and reliable QA engineer specializing in manual and automated testing with expertise in Java and a background in system administration. My experience encompasses meticulous test case design, bug tracking, creating automation scripts, and CI/CD processes. With a keen eye for detail and an analytical mindset, I ensure the delivery of high-quality products and collaborate effectively with teams to resolve issues promptly.

- Communication
- Problem-solving
- Teamwork

Education

2000 – 2006

Specialist in rehabilitation

Open International University of Human Development "Ukraine"

Language

English - intermediate

Ukrainian - native

Projects

FriendRate	[Manual tests, Selenium, Java, Rest Assured]
Doxy.me	[Beta testing, Functional, Accessibility Testing]
Redroverschool	[Docker, Selenium, Java, Maven, TestNG]
Saucedemo	[Playwright, Java, Allure, GitHub Action]

Work Experience

QA Engineer in Junfolio - FriendRate web app (start-up project)

12.2023 - 07.2024

- Created test documentation ([Test Plan](#), [checklists](#), test cases)
- Designed and executed manual and automated test cases using Selenium, Java, Allure, and RestAssured.
- Leveraged Git Actions to automate test execution and streamline the testing process.
- Collaborated effectively with developers using SCRUM methodology to identify and resolve bugs.
- Developed automated scenarios and collections in Postman for efficient API testing.

QA Engineer in StarWind Software

12.2021 - 05.2022

- Performed various types of manual testing: including functional, regression, system, and performance testing (load and stress testing).
- Created and maintained test documentation (checklists, and reports).
- Analyzed results to identify problems and errors.
- Created and administered fault-tolerant VMware vSphere Clusters.
- Worked with virtualization technology, including VMware ESXi, Hyper-V, StarWind HyperConverged Appliance, and Veeam Backup & Replication.
